Affinity Chosen as Third Party Auditor for U.S. EPA's Climate Leaders Pilot Program

Affinity is working as certified Greenhouse Gas Verifiers (GHG-V) through CSA International as a third party auditor for the U.S. EPA's Climate Leaders Small Business Network Member Third Party Assurance Pilot Program. Within this program, Affinity will work as a third party auditor that will assist small businesses by providing guidance on developing an inventory of company-wide GHG emissions, or a carbon footprint. The goal of this program is for Affinity and other third party auditors to develop guidelines and a checklist that U.S. EPA will use in the future to certify businesses' GHG Inventories.

The Third Party Assurance Pilot Program stems from the U.S. EPA's Climate Leaders Small Business Network. Climate Leaders is an EPA industry-government partnership that works with companies to develop comprehensive climate change strategies. As a small business, your company can take direct action on climate by reducing its greenhouse gas (GHG) emissions. By doing so, your company will also lower its energy bills, improve fuel efficiency in its fleets, and become a competitive supplier by having a more credible sustainability program. More information on the Climate Leader Small Business Network can be found:
<http://www.epa.gov/climateleaders/documents/smallbiznetwork.pdf>

Affinity Consultants, Inc. has accredited Greenhouse Gas Verifiers (GHG-V) on staff. The GHG-V certification is through CSA America and qualifies professionals to measure and account for the accuracy and validity of Greenhouse Gas (GHG) assertions. This certification assures third-party objectivity, provides quality assurance, establishes consistency in GHG verification practices, and creates confidence in verifier competency.

If you have any questions, or require more information on climate change, greenhouse gas emissions, and other environmental and sustainability issues, feel free to contact Affinity Consultants, Inc.
